
Every space is an
opportunity for inspiration.
ARBORITE®
HIGH PRESSURE LAMINATES

## Why Arborite

Established in Canada in 1948, Arborite is driven to create laminate designs that work well with other material palettes. We understand our product is often the last specified, and the last replaced. Our designs must be versatile and enduring—lasting in style as well as durability. We do the extra work to make sure Arborite is well-positioned to deliver solutions now and in the long-term.

## Designed in Montréal

For each launch we spend hundreds of hours keeping a pulse on complementary materials, researching market trends and talking to the architecture and design community. We bring these insights home to Montréal. Then we sort through the data and research, letting the complementary materials and the people who specify them show us what they need from our laminate. Those guidelines combine with our Montréal culture, and voilà! Arborite's distinct brand: European-inspired design solutions translated for North American applications.

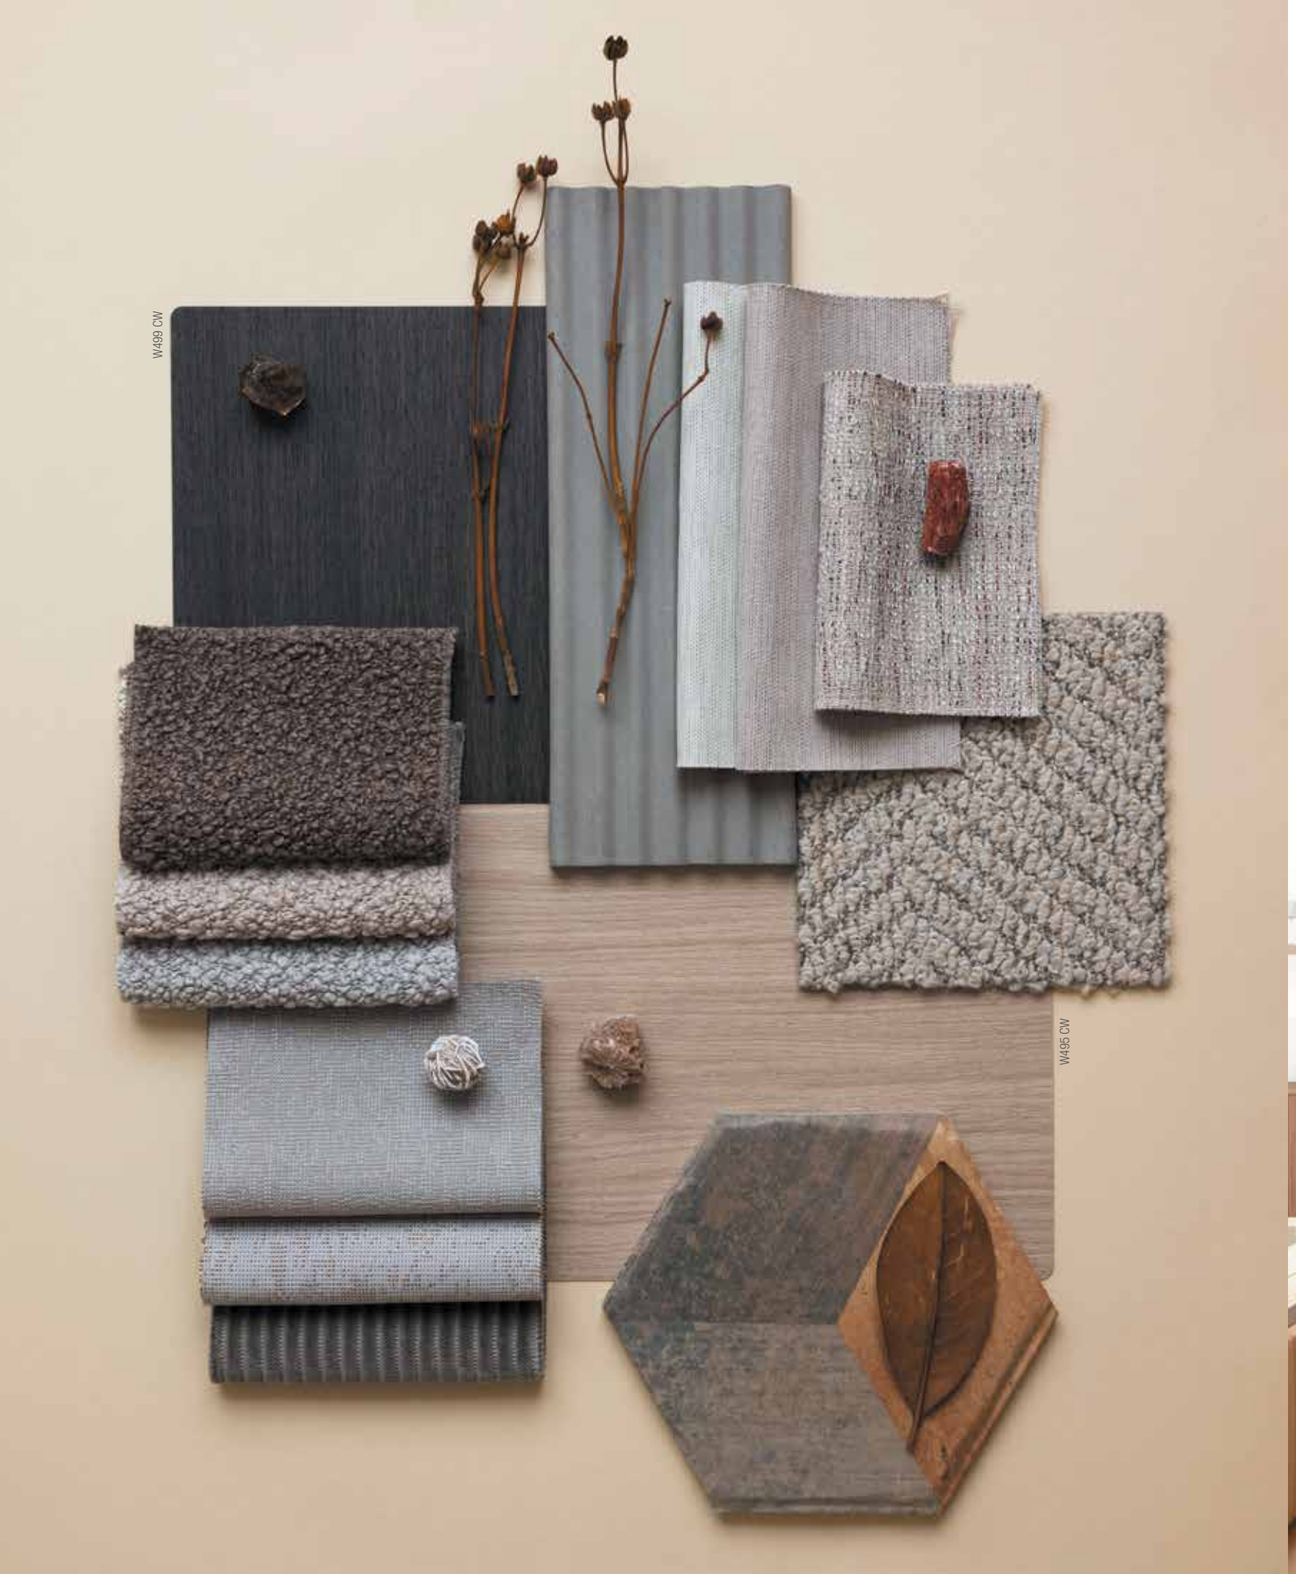

## Paper Empowered

"P-lam" or plastic laminate is a printed paper product. Working in close collaboration with the world's best printers, we not only achieve fidelity of natural materials but surpass their limits and solve problems. Through technology, we can offer the look of endangered wood species, create designs that combine organic and abstract characteristics, and underlay corrective tones to ensure colors don't "flip" in application.

## Environment

Our name, Arborite, means two things—"made from trees," and "keeper of trees." Our product was invented to conserve natural resources. To this day, we continually pursue that mission. Our FSC-Certified products are testimony of our commitment to environmentally appropriate, socially beneficial, and economically viable forest management. All Arborite laminates are GREENGUARD Indoor Air Quality Certified.

Product on the cover: W492 CW – Seaside White Oak

# Soothing Neutrals

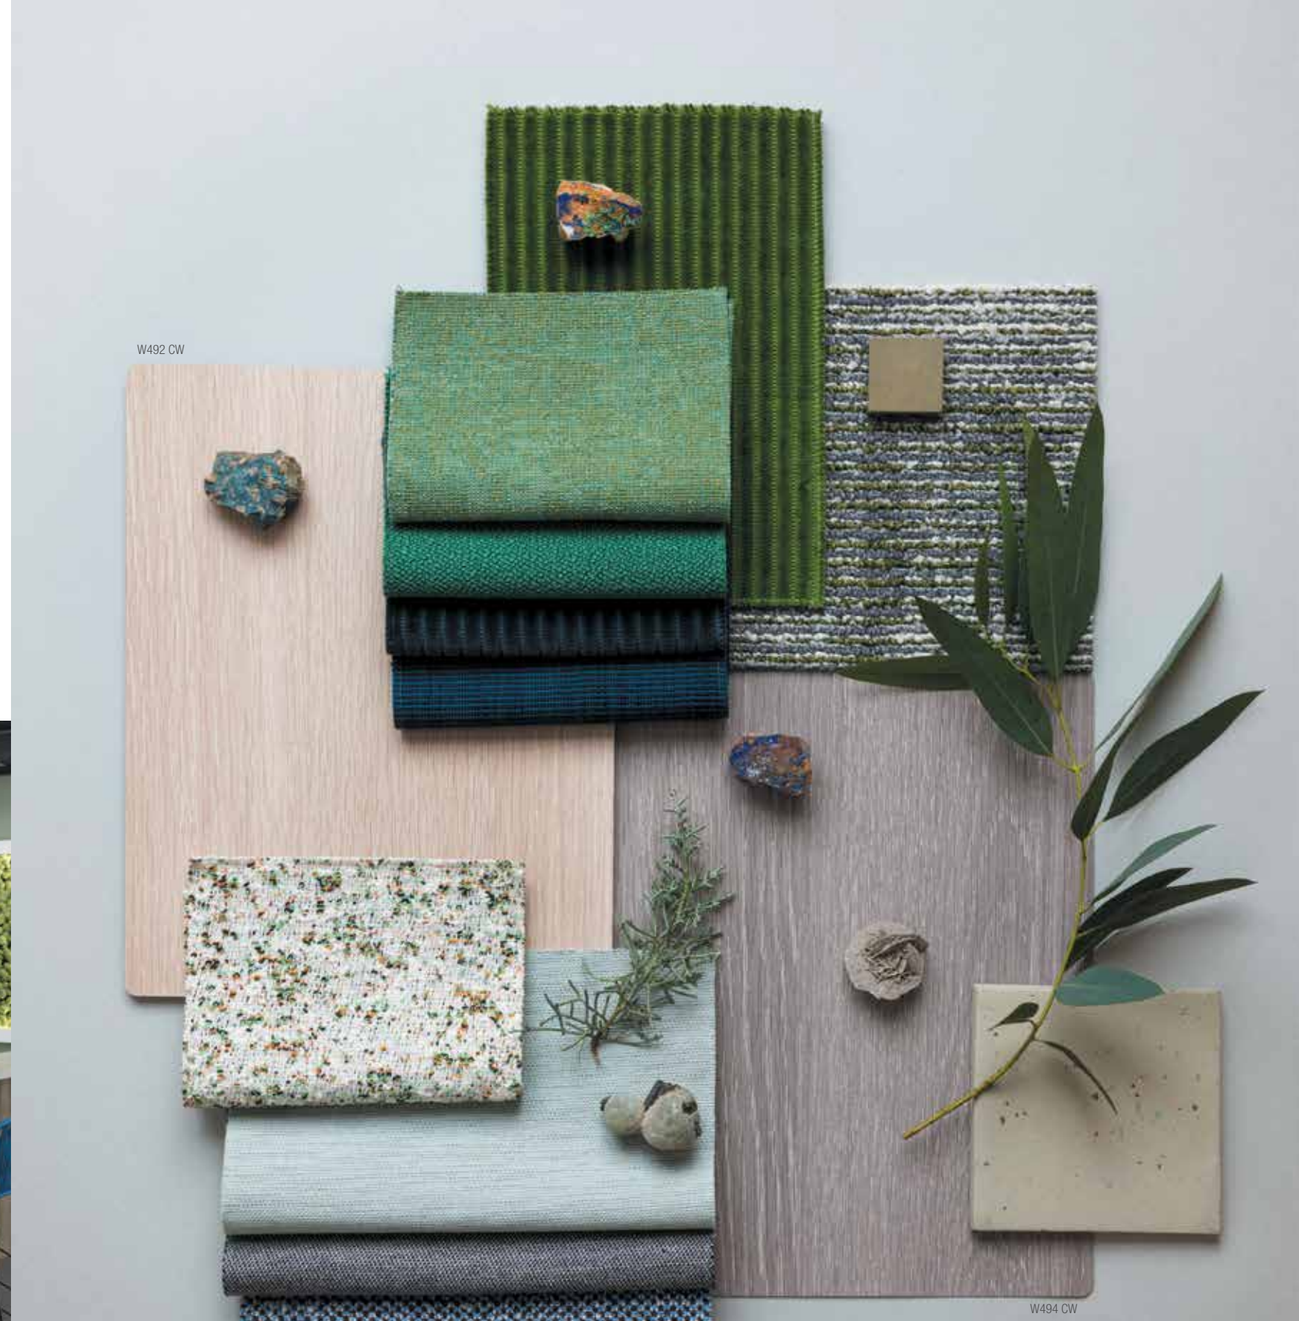

Two notable shifts in neutrals provide a stabilizing foundation for emerging trends. Turning in: warm, dark wood tones with modernized hints of brown and even red feel sophisticated and reliable. Looking out: soft, elegant neutrals including warm beiges, blush pinks and greys bring balance to both bright and monochromatic palettes- making spaces feel welcoming and familiar.

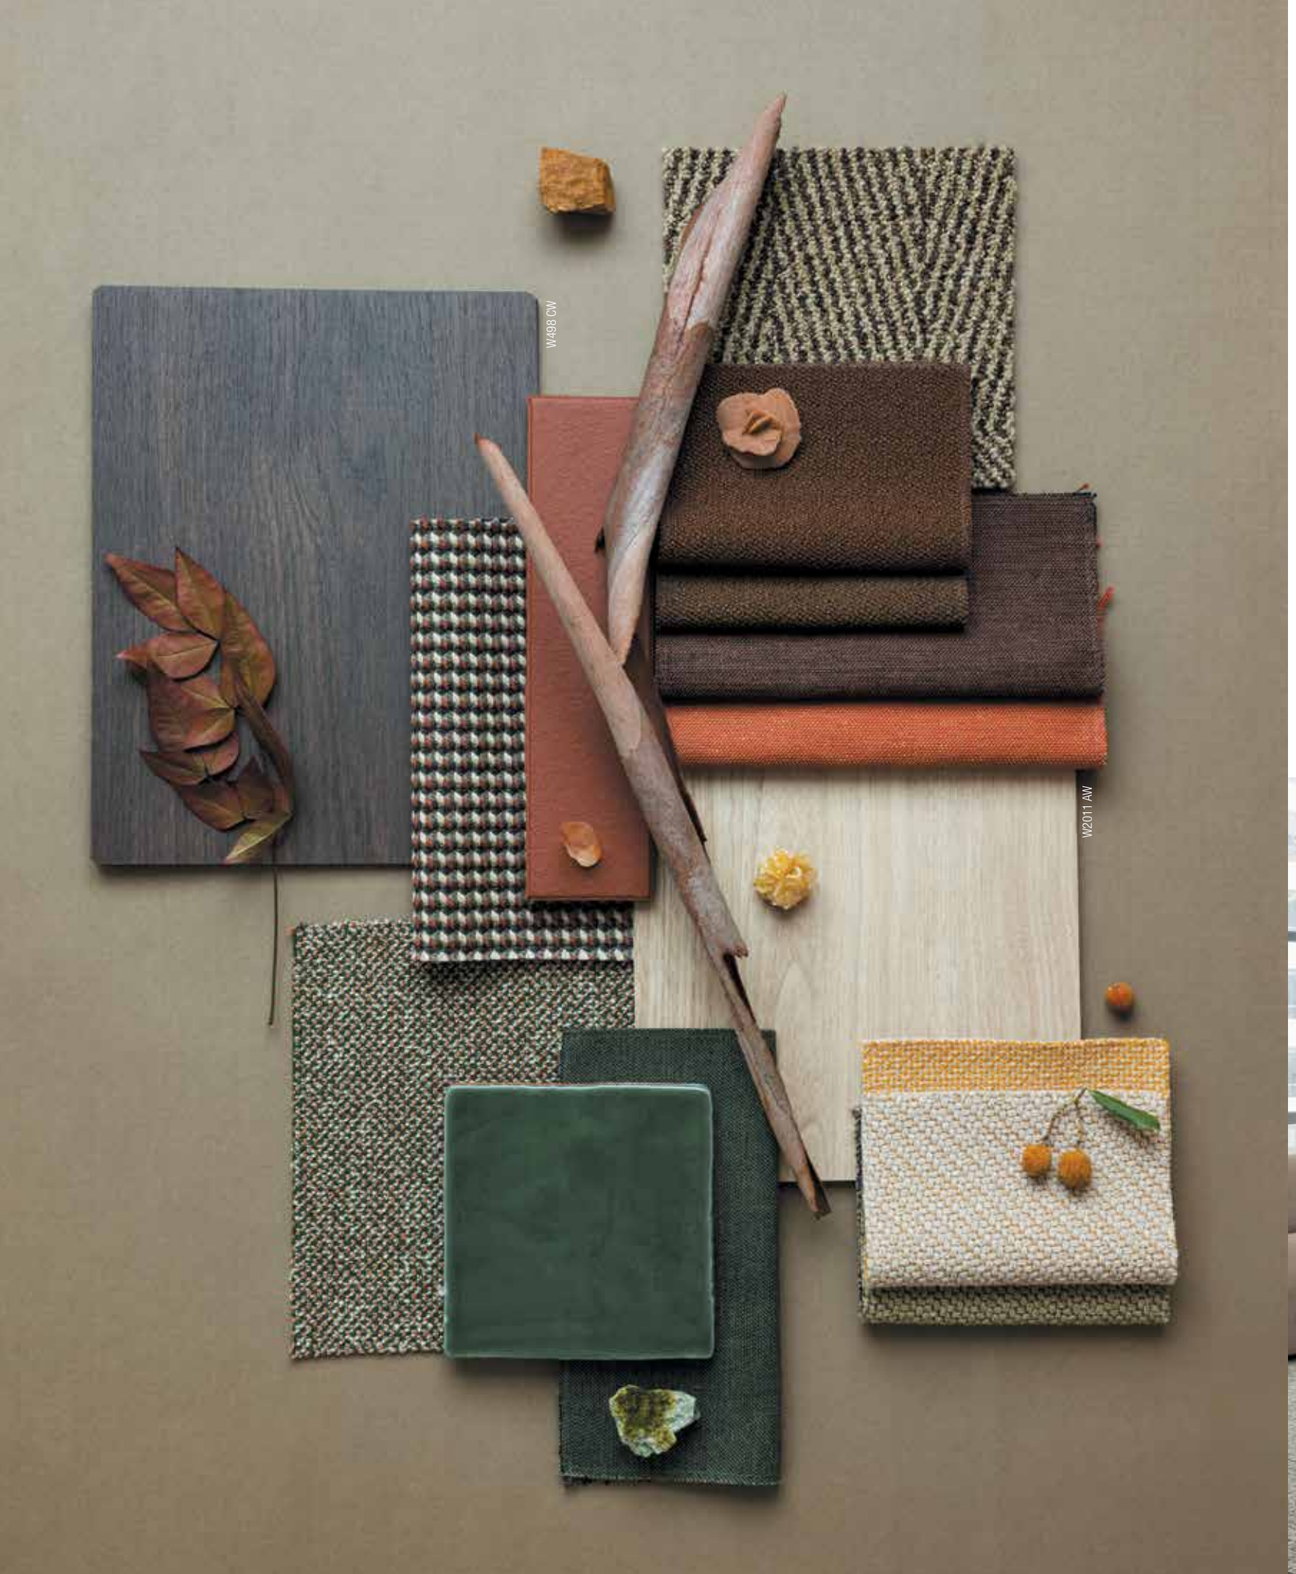

# Organic Optimism: Blues and Greens

As neutrals move away from austere grey, cheerful optimism comes through in the blue and green color story. Biophilia's relationship to wellness continues to trend with natural and elemental features. Today's blues and greens are gently tempered with cozy taupe, subtle silver, and muted gold. Color saturation is pastel and powdery, or aquatic and organic for a revitalizing and calming effect.

# Grounded Earth Tones

When busyness fell away there was a return to authenticity, self-reliance, and tradition. This is evident in the color story of earth tones, which include the nourishing aspects of red and orange. The comfort factor shows up in tones that are sun-baked and cooked-in. Brown charcoal, terracotta, and warming spices layer like a heritage recipe for self-care. Deep green, burnt orange and dark plum feel steadfast and reassuring. Modern earth tones offer a palette of enrichment and resilience without excess.

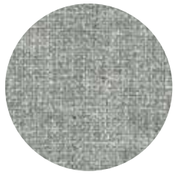

NEW COLLECTION

# Just In

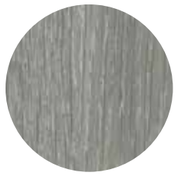

Driven by a global desire to increase comfort and reduce anxiety, public spaces are evolving in service of physical and mental well-being. Arborite's new designs provide reliable, refined, European-inspired solutions developed to integrate into larger palettes and tie other elements together. Both on-trend and resilient, Arborite's new laminates serve designers by grounding other material specifications without competing.

# Wood Looks

With a combination of realistic and wood-inspired designs these curated, organic patterns provide opportunity to achieve the look of rare and endangered woods sustainably. Specify classic wood patterns for use in applications where performance matters. Adding a premium texture to our woodgrains enhances their fidelity, so your project looks great in the long run.

STANDARD COLLECTION

# Patterns

Our patterns incorporate a unique and expansive selection of abstract designs. With geometric shapes, textile/organic motifs, metallics, concrete-inspired looks and engineered stones these collections provide endless inspiration. Flexible and versatile, these options seamlessly complement other materials within an environment. Patterns are available in a standard finish or can be enhanced with other available textures.

# Pure collection anti-fingerprint laminate

Keeping your surfaces streak free has never been easier with Arborite's Pure collection. With a luxurious, velvety texture, Pure features fingerprint-resistant technology to ensure that your high-traffic areas are free of fingerprints and smudges. As with all Arborite products, Pure is easy to clean, heat resistant and durable.

# Commercial Stones

From large-scale marble to small-scale concrete patterns, laminate can add a natural element for wow-factor or under-stated elegance. And unlike their real counterparts, laminates are stain-resistant, heat-resistant, easy-to-clean/ disinfect, easy-to-fabricate, sustainable and budget friendly. So, go ahead. Specify a modern stone laminate with confidence.

# Specialty Collections

Arborite has you covered with specialty products engineered to provide solutions to specific needs in many different segments and applications.

## Performance Solutions

**Fire Rated**
Fire-retardant laminates for applications where building codes require fire retardant qualities.

**ArboChem**
Formulated to resist a variety of chemicals.

**High Wear**
High pressure laminates designed for heavy use areas.

**Compact Grade**
Self supporting panels providing significant impact resistance.

## Coloredge
