The Luxury of Clean

Clean & Disinfect

Clean with Confidence
Cleaning removes germs and dirt from surfaces to help reduce the risk of spreading infection. HPL is stain and moisture resistant, making it easy to remove the impurities that build up during every day use.

Disinfect without Damage
Chemical disinfectants (for instance, EPA-registered disinfectants) kill germs on the surface, lowering the risk of spreading infection. Increasingly residential and commercial customers are demanding surfaces, like HPL, that stand up to commercial disinfectants and sanitizers.

Impenetrable Integrity
Arborite HPL will withstand most types of cleaners and disinfectants without compromising the integrity of the surface design. Refer to our Care & Maintenance Instructions as well as Cleaners & Disinfectants document in the resources section.

Arborite High Pressure Laminate's non-porous and easy to care surface requires no sealing or refinishing – a convenient material solution for interior spaces where cleanability is an important aspect of user protection.
To clean Arborite® HPL surfaces on a daily basis, all you need is dishwashing liquid, warm water and a microfiber cloth. Apply a mixture of dish soap and water to your counters using the cloth. As you wipe the surface, rinse your cloth in clean water. Arborite recommends the following cleaners:

- Windex®
- Fantastik®
- Isopropyl Alcohol (Isopropanol)
- Glass Plus®
- Mr. Clean®
- Formula 409®
- Purell® Multi-Surface

**Diluted Bleach Solution**
As with any disinfectant, soiled surfaces need to be cleaned with water and detergent first. When properly used, bleach is a strong and effective disinfectant – its active ingredient, sodium hypochlorite, is effective in killing bacteria, fungi and viruses. A diluted bleach solution* following CDC mixing guidelines is an acceptable chemical disinfectant if used appropriately.

- A bleach solution may be prepared by mixing:
  - 5 tablespoons (1/3 cup) bleach per gallon (3.78 liters) of water, or,
  - 4 teaspoons (20 ml) per quart (4 cups of water).
- CDC recommends a contact time of at least one minute.
- Exposure of a bleach solution should not exceed two minutes.
- Always rinse thoroughly with warm water and soap and water after use.
- Follow manufacturers’ guidelines and safety precautions.

**Branded Cleaners & Disinfectants**
The following branded cleaners and disinfectants have been tested on Arborite® surfaces based upon ISO 4586-2 Method 31 (B) and BIFMA HCF 8.1-2014 (Section 6/Modified) test standards. Results vary by product type and can be found on our Technical Data Sheets.

To determine if a product is registered with the EPA for use against SARS-CoV-2, the virus that causes COVID-19 refer to EPA: List N: Disinfectants for Use against SARS-CoV-2.

CAUTION – Cleaners and disinfectants with the following active ingredients in various mix ratios and solutions may pose a threat to any surface and cause irreparable damage. Prolonged exposure of the surface to bleach will cause discoloration.

- Peroxide(s)
- Bleach (sodium hypochlorite)
- Strong acids (phosphoric acid is often used, very low pH values)
- Strong bases (sodium hydroxide, potassium hydroxide, high pH values)

As is the case with all cleaners, exposure time is the key. Often surface damage is due to poor removal of the cleaning agent (spills, drips, etc. that are not removed). It is recommended to test a cleaner on a small area of the surface first. Prolonged exposure, chemical dilutions and frequency of cleaners, disinfectants, and/or sanitizers used on the surface can cause degradation and/or discoloration.

For additional information on how to properly clean & disinfect your surfaces, please refer to the following documents that can be found at [www.arborite.com/care-and-maintenance](http://www.arborite.com/care-and-maintenance)

When in question of cleaners, detergents, sanitizers or chemicals found in them, please contact the Arborite® team at 1.800.996.0366 for review and determination of how it will affect Arborite® surfaces.

- EPA Reg.# 5813-120
- EPA “List N” (YES)
- Contact Time: 10-Minutes

**Active Ingredient**
Sodium Hypochlorite 4-9%

**Manufacturer Surface Notes**
NO specific claims with regards to surface material compatibility.

**Arborite Tested**
Please refer to Arborite Technical Data Sheets for results by product type.

**Clorox® Disinfecting Spray**
- EPA Reg.# 67619-21
- EPA “List N” (YES)
- Contact Time: 10-minutes

**Active Ingredients**
0.1890% octyl decyl dimethyl ammonium chloride,
0.0945% dioctyl dimethyl ammonium chloride, 0.0945%
decyl dimethyl ammonium chloride, 0.2520% alkyl (50% C14, 40% C12, 10% C16) dimethyl benzyl ammonium chloride, 58.06% ethanol.

**Manufacturer Surface Notes**
Clorox® Disinfecting Spray also kills and prevents the growth of mold, protecting surfaces from discoloration and damage. Because it’s bleach free, it’s compatible on a wide variety of high-touch surfaces. NO specific claims with regards to surface material compatibility.

**Arborite Tested**
Please refer to Arborite Technical Data Sheets for results by product type.

**Clorox® Disinfecting Wipes**
- EPA Reg.# 5813-79
- EPA “List N” (YES)
- Contact Time: 4-minutes

**Active Ingredients**
0.145% n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chloride, 0.145% n-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chloride.

**Manufacturer Surface Notes**
To disinfect: Use on hard, non-porous surfaces. Wipe surface to be disinfected. Use enough wipes for treated surface to remain visibly wet for 4 minutes. Let surface dry. NO specific claims with regards to surface material compatibility.

**Arborite Tested**
Please refer to Arborite Technical Data Sheets for results by product type.

Commercial Cleaners & Disinfectants

Diversey™ Expose II 256
EPA Reg.# 70627-6
EPA “List N” (NO)
Contact Time: germ/virus dependent

Active Ingredients
- Benzyl-p-chlorophenol 10.5%
- Phenylphenol 10.5%

Manufacturer Surface Notes
For use on hard, non-porous surfaces such as floors, walls, metal surfaces, painted surfaces, exterior bowl surfaces, empty basins, showers, conductive flooring and lavatory fixtures. For use in hospitals, nursing homes, schools, colleges, medical and dental offices. Compatible with most healthcare assets.

Arborite Tested
Please refer to Arborite Technical Data Sheets for results by product type.

Diversey™ Oxivir® 1 Wipes
EPA Reg.# 70627-77
EPA “List N” (YES)
Contact Time: 1-minute

Active Ingredient
Hydrogen Peroxide 0.5%

Manufacturer Surface Notes
This product can be used in multiple areas including operating rooms, long-term care facilities, medical facilities, animal treatment facilities, cruise ships, hotels, public buildings, public restrooms, recreational facilities, retail businesses and schools (colleges and universities), and is compatible with most hard, non-porous surfaces.

Arborite Tested
Please refer to Arborite Technical Data Sheets for results by product type.

Diversey™ Oxivir® Tb Wipes
EPA Reg.# 70627-56
EPA “List N” (YES)
Contact Time: 1-minute

Active Ingredient
Hydrogen Peroxide 0.5% w/w

Manufacturer Surface Notes
Compatible with most hard, non-porous surfaces while harnessing the power of Accelerated Hydrogen Peroxide® (AHP) technology.

Arborite Tested
Please refer to Arborite Technical Data Sheets for results by product type.

Diversey™ Stride Floral Neutral Cleaner
EPA Reg.# EPA# 70627-6
EPA “List N” (None Found)
Contact Time: (N/A)

Active Ingredients
- Alcohol ethoxylates 15-40%
- Sodium xylene sulfonate 3-7%
- Dipropylene glycol 0.5-1.5%

Manufacturer Surface Notes
For use as a daily and general cleaner. Versatile formula that performs in a variety of application methods such as an autoscrubber, spray and wipe and mop and bucket.

Arborite Tested
Please refer to Arborite Technical Data Sheets for results by product type.

Diversey™ Virex® II 256 One-Step Disinfectant Cleaner & Deodorant
EPA Reg.# 70627-24
EPA “List N” (YES)
Contact Time: 10-minutes

Active Ingredients
- Didecyl dimethyl ammonium chloride 8.704%
- Dimethyl benzyl ammonium chloride 8.190%

Manufacturer Surface Notes
Used in medical and general institutional facilities. Use solution is neutral to floor finish so it will not dull, pit or soften floor finishes.

Arborite Tested
Please refer to Arborite Technical Data Sheets for results by product type.

Interim Recommendations for U.S. Households with Suspected or Confirmed Coronavirus Disease 2019 (COVID-19)

This guidance provides recommendations on the cleaning and disinfection of households where persons under investigation (PUI) or those with confirmed COVID-19 reside or may be in self-isolation. It is aimed at limiting the survival of the virus in the environments. These recommendations will be updated if additional information becomes available. These guidelines are focused on household settings and are meant for the general public.

How To Clean And Disinfect Hard (Non-Porous) Surfaces

→ Wear disposable gloves when cleaning and disinfecting surfaces. Gloves should be discarded after each cleaning. If reusable gloves are used, those gloves should be dedicated for cleaning and disinfection of surfaces for COVID-19 and should not be used for other purposes. Consult the manufacturer’s instructions for cleaning and disinfection products used. Clean hands immediately after gloves are removed.

→ If surfaces are dirty, they should be cleaned using a detergent or soap and water prior to disinfection.

For disinfection, most common EPA-registered household disinfectants should be effective.

Visit https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2 to find the current list of products that meet EPA’s criteria for use against SARS-CoV-2, the cause of COVID-19. Follow manufacturer’s instructions for all cleaning and disinfection products (concentration, application method and contact time, etc).

Additionally, diluted household bleach solutions (at least 1000ppm sodium hypochlorite) can be used if appropriate for the surface. Follow manufacturer’s instructions for application, ensuring a contact time of at least 1 minute, and allowing proper ventilation during and after application. Check to ensure the product is not past its expiration date. Never mix household bleach with ammonia or any other cleanser. Unexpired household bleach will be effective against coronaviruses when properly diluted.

Prepare a bleach solution by mixing:
  → 5 tablespoons (one-third cup) bleach per gallon of water or,
  → 4 teaspoons bleach per quart of water

Always rinse thoroughly with warm water and soap after appropriate use of diluted bleach solution.

Exposure (contact or kill time) should not exceed the CDC recommended time due to the effects on the surface due to over-exposure and possible degradation of the surface. Etching and surface degradation were observed slightly on various diluted solutions using hypochlorite based products.

Source: CDC

05/2020 RV1
Routine Care

Your decision to purchase Arborite® High Pressure Decorative Laminate (HPDL) will bring you years of quality performance.

Everyday cleaning of our products is as simple as a quick wipe with a damp sponge. All resist muddy fingerprints, coffee spills and so much more.

Be sure to read and follow the recommended care and cleaning procedures.

To clean the surface, use a damp cloth or sponge and a mild soap or detergent. Rinse thoroughly with warm water and wipe dry.

Difficult stains such as coffee or tea can be removed using a mild household cleaner/detergent and a soft bristled brush, repeating as necessary.

If a stain persists, use a paste of baking soda and water and apply with a soft bristled brush. Light scrubbing for 10 to 20 strokes should remove most stains. Although baking soda is a low abrasive, excessive scrubbing or exerting too much force could damage the decorative surface.

Stubborn stains that resist any of the above cleaning methods may require the use of undiluted household bleach or nail polish remover. Apply the bleach or nail polish remover to the stain and let stand no longer than two minutes. Rinse thoroughly with warm water and wipe dry. This step may be repeated if the stain appears to be going away and the color of the High Pressure Decorative Laminate (HPDL) has not been affected.

WARNING: Prolonged exposure of Arborite® High Pressure Decorative Laminate (HPDL) surfaces to bleach will cause discoloration.

Hot pans and heat-producing appliances (such as electric skillets), when set directly upon countertops, can mar the product’s beauty. Always use a heat shield, hot pad or trivet.

A few notes of caution

→ Acidic or abrasive cleaners can damage a Arborite® High Pressure Decorative Laminate (HPDL) do not use them.

→ Drain cleaners containing lye will permanently damage a High Pressure Decorative Laminate (HPDL). If you spill a drain cleaner, wipe it up immediately and rinse several times with water.

→ Hair dyes, textile dyes, and food dyes can cause permanent stains. If dye should happen to spill, wipe it up immediately with dishwashing detergent or an all-purpose cleaner.

→ Never place pots or dishes directly from the oven or burner on an unprotected High Pressure Decorative Laminate (HPDL) surface; such extreme heat can cause damage to the surface.

→ Do not work with oven cleaners on an unprotected countertop. Wipe spills away promptly and rinse several times with water.

→ Rust removers contain harsh chemicals which will quickly cause permanent damage. If a spill occurs, wipe off all residue immediately, wash thoroughly with soapy water and rinse several times.

→ Steel wool and other abrasive pads will damage Arborite® High Pressure Decorative Laminate (HPDL). Don’t use them for cleaning and don’t store steel wool pads on your countertop; the metal can rust and leave stains.

→ Toilet bowl cleaners contain harsh chemicals that can cause permanent damage. If spills occur, wipe up immediately, wash surface with soapy water and rinse several times.

Reccomended household cleaners

→ Windex®
→ Glass Plus®
→ Fantastik®
→ Mr. Clean®
→ Formula 409®
→ Isopropyl Alcohol (Isopropanol)

Prolonged exposure to bleach will cause discoloration.

When cleaning Arborite® High Pressure Decorative Laminate (HPDL), DO NOT use products that contain the following ingredients:
